Rome, September 22.

THE Letters from *Naples* tell us they had advice by a Vessel arrived there from the *Levant*, that the Venetians had taken *Modon* in the *Morea*, but it needs a Confirmation.

Venice, Sept. 29. The Forces of this Republick, according to the advices we have received this week, continued encamped on the second of this month in the Neighborhood of *Coron*, Captain General *Morosini* being resolved not to remove from thence till the Fortifications of that Place, which had been ruined during the Siege, were repaired. He had caused all his Sick Men to be Transported to St. *Maura*; And had sent six Gallies to *Calamata* to Encourage the Mainottes to cast off the *Ottoman* Yoak and to put themselves under the Protection of the Republick. By a Saique arrived from *Zara* we are informed that the Chevalier *Fanco* was marched with a Body of Morlaques to make an incursion into the Turkish Territories.

Lembourg, Sept. 16. We have Letters from the Army of this Crown of the 10th instant, which was then still encamped near the *Niester*. The Crown General had held a Council of War, where it was resolved that the Army should march the 11th to meet the Forces of *Lithuania*, who advanced very slowly towards them, and that after their Conjunction they should pass the *Niester*, and enter into *Moldavia*. The freshest account we have of the Enemy, is, that the Serasquier *Soliman Mahomet* was marching with an Army of about 30000 Men towards the *Niester*; And that in the mean time the Tartars had undertaken to defend the Passage of that River. It is confirmed that the Turks have put a great Convoy into *Caminiec*, so that that place is now sufficiently provided with all things necessary for its defence. The Cossacks in the Service of this Crown are continually abroad in Parties to observe the Enemy, and have of late defeated several small Bodies of Tartars. The Moscovites Fortifie *Czekrin*, and thereby give great jealousie to the Turks. The King and Queen of *Poland* are expected in few days at *Zolkiew* where their Majesties have used to pass the latter part of the year; as we are told they intend now to do. They write from *Moscow* that the Czars had declared that they would appoint Commissioners to meet at some convenient place on the Frontiers with those of this Crown, for the composing the differences about the limits.

Vienna, Sept. 30. The Elector of *Bavaria* parted from hence the 24th instant with the Arch-Dutchess his Wife, their Imperial Majesties accompanying them to Our Lady of *Brun*, two miles from hence, where they dined, Their Electoral Highnesses having taken leave of their Imperial Majesties, continued their Journy towards *Munick*. Prince *Waldeck* and the Baron *de Dingben*, are returned hither from the Imperial Army, which they left encamped between the Rivers *Ipol* and *Gran* where the Duke of *Lorrain* intended to continue till he had an account from the Baron *de Mercy*, of the success of the design upon *Agria*; His Highness notwithstanding the ill condition in which the Turks left *Novigrad*, has given Orders for the Fortifying that place, towards the Expence whereof the Pope has given a good sum of Mony. We have advice that the Serasquier finding all his Endeavours for the setting on foot a Negotiation for a Peace, or a Truce ineffectual, has repassed the Bridge of *Essek*, and has separated his Forces, sending part of them towards *Zigeth*, and the rest towards *Sclavonia* and *Bosnia*; The 6000 Men with which Count *Palfi* had Orders to march towards *Croatia* to joyn the Forces Commanded by General *Leslie*, were according to the last account we had of them, advanced no farther than the *Rabau*, and seeing the lateness of the year, as well as the detachements the Serasquier has sent to reinforce the *Ottoman* Forces on that side, will in all likelihood hinder the Execution of the design Count *Leslie* had formed to attack *Possega*, it's believed these Troops under the Orders of Count *Palfi* will be countermanded. They write from *Newhensel* that they had quite cleansed the great Ditch, and brought the Water into it as before the Siege; That the Trenches were all filled up; That they are at present repairing the two attackt Bastions; and that the Governor had summoned in 2600 Peasants out of the Neighbouring Counties to work on the said Fortifications. The Letters from Upper *Hungary* inform us that General *Schultz* was before *Caschaw*; And that General *Caprara* was marched directly towards *Tockay*, resolving to take that place whatever it cost, that he might thereby open a Passage and Correspondence between *Transilvania* and *Zatmar*. The President of the Council of War, the Commissary General, and the Baron *d' Abele* have frequent conferences together about settling the Winter-Quarters. It's said the Troops of *Brunswick* and *Cologne* will have their's in *Hungary*, *Silesia* and *Moravia*. The Count *de Coningsmark*, Maistre *de* Camp General of the Forces of the King of *Sueden*, is arrived here, and we are told he is Treating with the Ambassador of *Venice*, about his entring into the Service of that Republick during the present War, as General of their Forces by Land. We receive just now certain advice that *Caschaw* has surrendred upon Articles. And there are Letters which say that the Garison and Inhabitants of *Tockay* had sent Deputies to General *Caprara* to Capitulate.

Ratisbonne, Octob. 5. We have an account by an Express, which came from *Vienna* the second instant, that the Empress was the day before brought to Bed of a third Son, to the great joy of that Court. The Letters from *Hungary* tell us that the Imperial Army Commanded by the Duke of *Lorrain* would separate in few days, and go into their Winter Quarters, his Highness having received advice that the Serasquier had repassed the Bridge of *Essek*, having sent a detachement to reinforce the *Ottoman* Troops on the side of *Sclavonia*, that they might be able to make head against General *Leslies* Army, which was encamped the 20th of this month near *Turanowitz*, having a Bridge over the *Drave*, which they had secured by planting several pieces of Cannon at the head of it.

The
